V. Read the four texts below. There are ten questions about the texts. Decide which text *A*, *B*, *C* or *D* tells you the answer to the question. The same text may be used more than once. The first one is done for you.

A

Very hot weather might sound like fun but it can make people quite ill. The very old and the very young, sick and overweight people are most at risk. And it could get worse. The weather experts say that we'll have hotter summers and wetter winters in the next decade or two.

B

The weather experts told us to expect higher temperatures than usual this summer, with very little rain. They were right. With only 26mm of rain in June, Vancouver's gardens turned from green to brown. July was dry and August was even worse. Government departments checked that their fire-response centres were ready for any emergency.

C

A heat wave is a long period of hot weather in a geographical area which usually has cooler weather. In a country where the temperature is usually high, the same hot weather may not be referred to as a heat wave. The name is therefore used to describe extraordinary weather variations.

D

Sorry you couldn't come to visit, Bob, but maybe it was lucky. I know you enjoy sunshine and the heat, but it's awful here at the moment. You can't go out in the afternoon at all because of the heat wave. I'm hoping it'll be cooler when you do eventually visit, maybe in October.

Which text:

1. reports how officials responded to heat wave?**B**.....
2. warns about the effects of hot weather on health?
3. defines the meaning of the word 'heat wave'?
4. describes a personal experience of hot weather?

Which text gives you the answers to the following questions?

5. Is hot weather always called a heat wave?
6. Who believed the summer would be dry?
7. Who must be especially careful when it is hot?
8. Who likes very hot weather?
9. Which month was the driest?
10. What is the weather forecast for the next twenty years?
